## eeef highlights

### COMPLETING A FULL CIRCLE ON PORTUGAL'S LARGEST AGGREGATED STREET LIGHTING INFRASTRUCTURE UPGRADE IN ALENTEJO CENTRAL, INCLUDING THE UNESCO WORLD HERITAGE SITE OF ÉVORA

In 2018, the eeef implemented a tailor-made financing facility of €12m to support the renovation of street lighting infrastructure across Alentejo Central Region, including the UNESCO World Heritage site of Évora.

The project came to fruition due to the support of European Commission's technical assistance facility managed by the eeef. The assistance was instrumental in the feasibility study and in aggregating numerous smaller projects across 14 municipalities into a single sizeable project requiring over €15m in upfront investment works and financing. Amener, I-Sete and eeef joined forces in a collaborative approach to structure the financing and seamlessly manage renovation work for ca. 56,000 street lighting luminaries across numerous locations within 12 months implementation despite setbacks during COVID-19 restrictions.

In terms of tangible outcomes, the luminaries realized annually savings of 78% in primary energy consumption (PEC) and in CO<sub>2</sub> emissions compared to their respective baselines. This translates to accumulated savings of 234,476 MWh in PEC and 27,401 tCO<sub>2</sub>e emission till date. Furthermore, assuming the further life span of luminaries until September 2031, the saving these luminaries will continue to deliver savings estimated at ca. 553,245 MWh in PEC and ca. 55,088 tCO<sub>2</sub>e emission. Last but not the least, these works also generate budgetary savings to the 14 underlying municipalities represented by Comunidade Intermunicipal do Alentejo Central (CIMAC\*). These savings are estimated to add up to ca. € 7.1 million until September 2031.

The closing of this facility will also mark successful completion of a full circle of support from the eeef: from conducting feasibility studies and preparation of the investment project to technical implementation, financing and repayment. Starting April 2024, in accordance with existing agreements with eeef, the project will benefit from a refinancing option provided by the local bank and facilitated by the operational stability and predictable cash flows.

## eeef TAF highlights

Following the successful completion of the first collaborative project with the European Investment Bank (EIB) under the eeef's Technical Assistance Facility (TAF) programme, eeef signed a new collaboration agreement in 2023 that will allow the Fund to expand the TA Facility and support an even greater number of public authorities. On 26 January 2024, eeef launched a call for proposals for public authorities. Due to the high demand and interest from public authorities in Latvia, Lithuania, Italy, Romania, and Spain, the deadline was extended to 15 April 2024. Active collaboration with these authorities is expected to begin from Q2/2024.

Portfolio overview

Current Committed Investments\*

Investments by Partner Institution

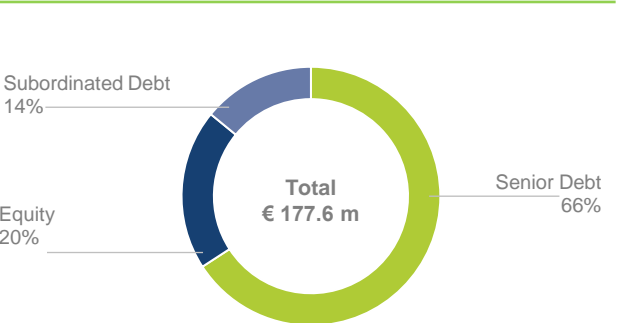

Investments by Country

Investments by Project Sector

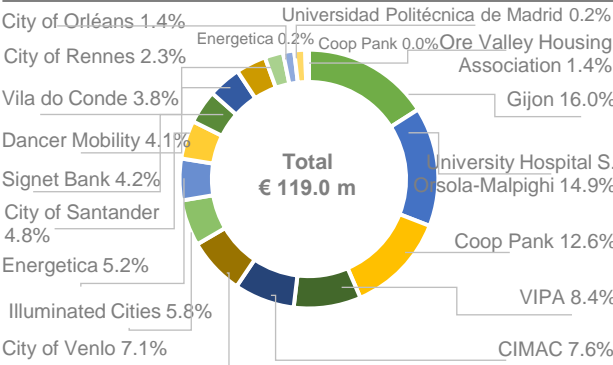

Investments by Financial Instrument

Outstanding Amount\*\*

Outstanding amount by Partner Institution

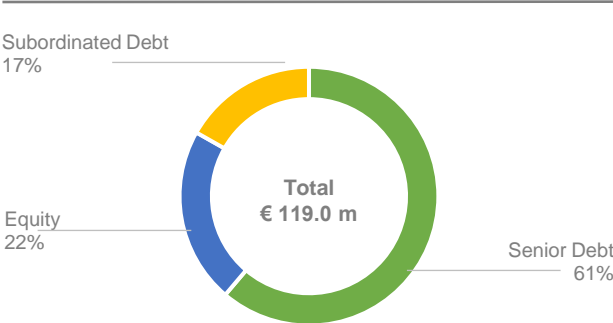

Outstanding amount by Country

Outstanding amount by Project Sector

Outstanding amount by Financial Instrument

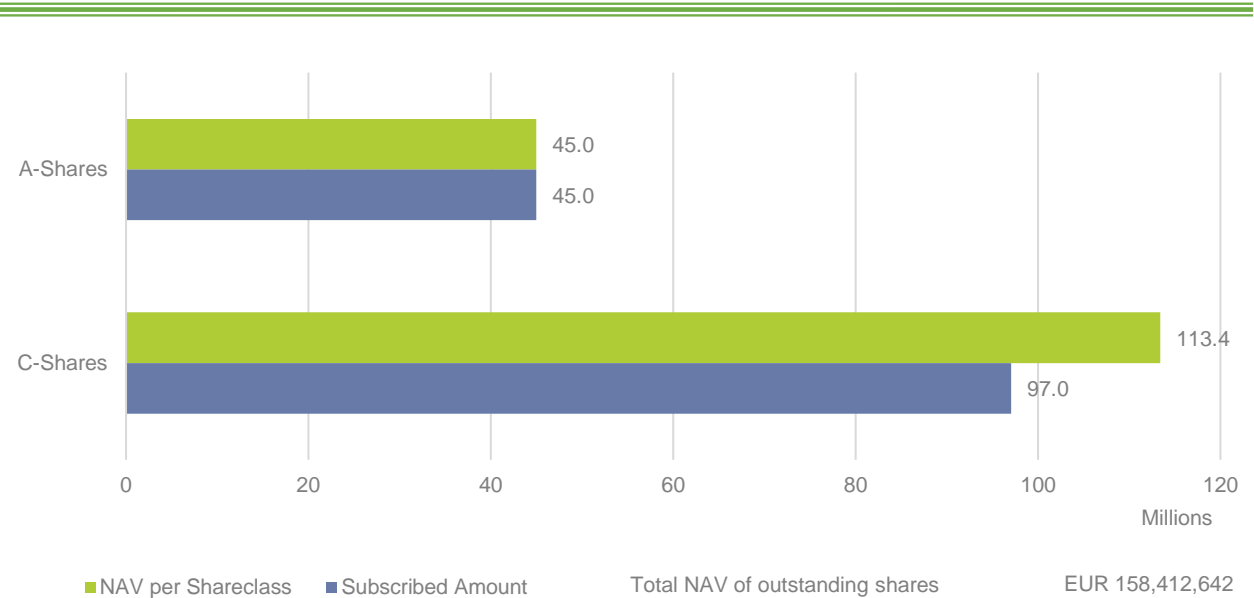

\*Based on nominal amount signed with active investments, excluding interest capitalised during construction phase. Does not include €60.6m of matured/repaid investments: Bolloré Autolib (€30m); SPL Region Rhone-Alpes (€5m); Banca Transilvania (€25m); University of Applied Sciences Munich (€0.6m)

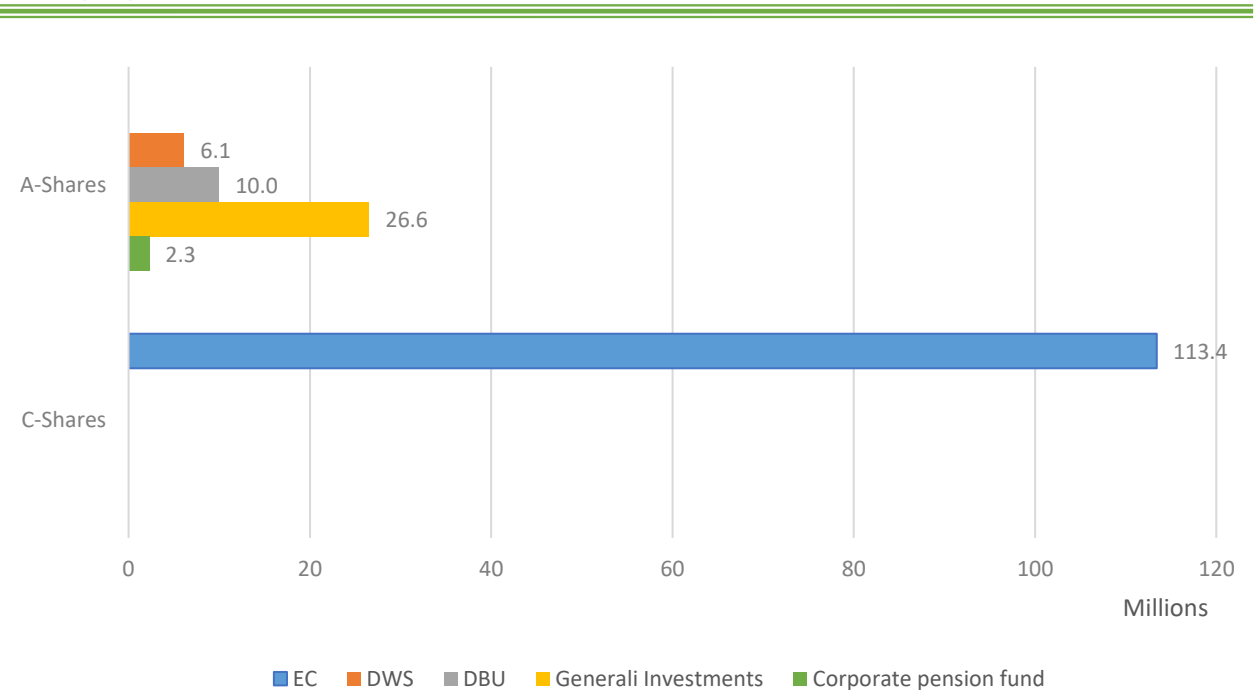

\*\* Provisional not audited figures to be repaid by active investments. Excluding cash position.

Investor Capital Structure

Net asset value (NAV)\* of outstanding shares as of 31/03/2024, in EUR million

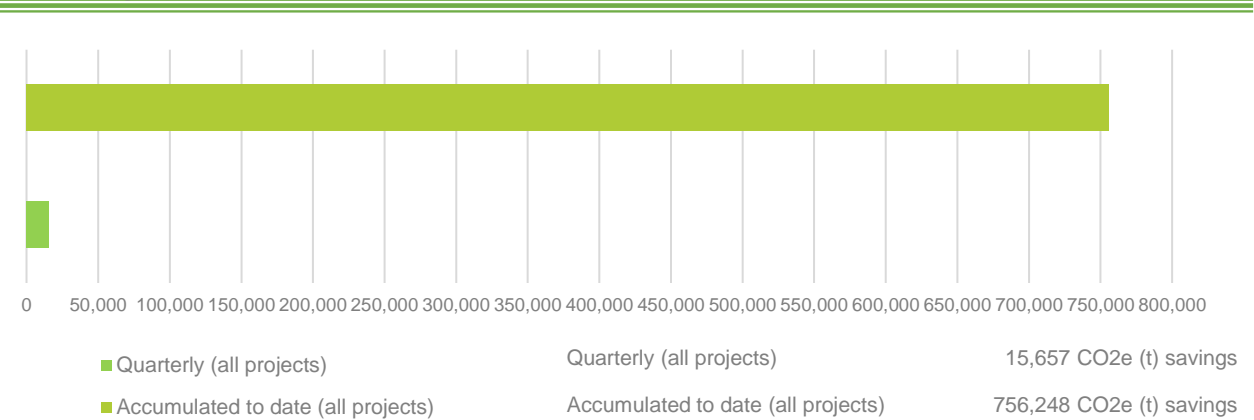

NAV split per investor as of 31/03/2023, in EUR million

Not including €57 million of uncalled capital.

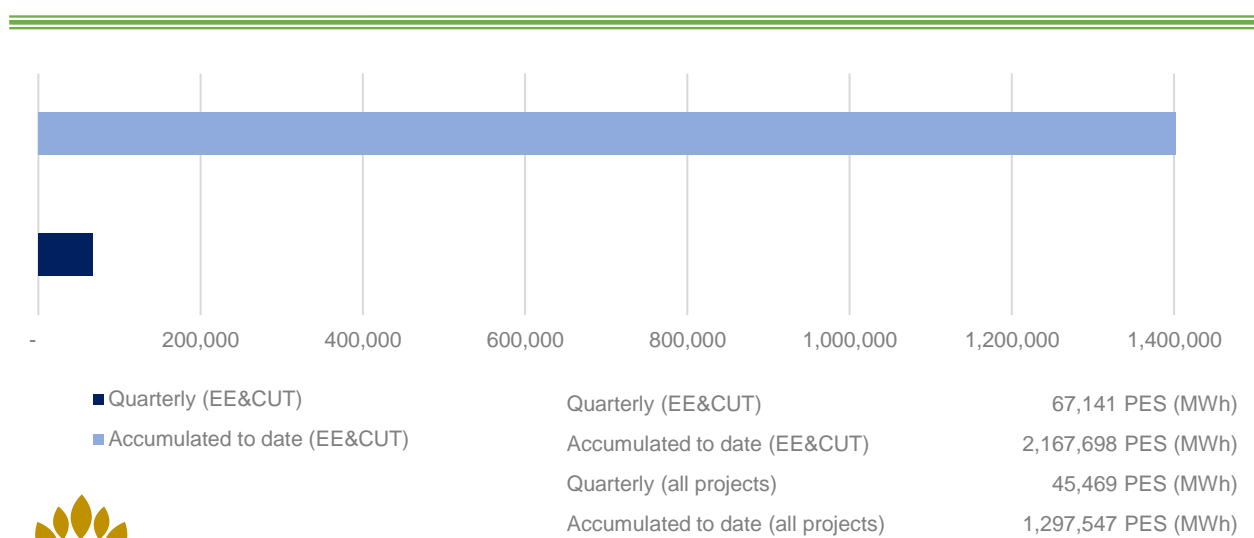

Impact Assessment

CO<sub>2</sub> savings (tCO<sub>2</sub>e)

All projects cover Energy Efficiency (EE), Clean Urban Transport (CUT) and Renewable Energy (RE) projects. RE projects contribute positively to carbon savings, but negatively to primary energy savings (PES). This is due to the higher primary energy demand of such technologies. In the case of biomass plants, the amount of heat released during the combustion of one unit of biomass is substantially lower than any fossil fuel. For illustrative purpose, the Lower Calorific Value (MJ/Kg) of biomass (17) lags behind that of diesel (43) and methane (50). Such thermal energy is needed for the combustion engine to produce electricity (and heat for cogeneration) and therefore leads to lower efficiency for biomass plants.

Primary Energy Savings (MWh)

eeef enabled CO<sub>2</sub>e savings cumulatively equal to the emissions sequestered by **34,374,916** mature trees

Loan maturity (LM) is the anticipated date the investment will be fully repaid. Economic maturity (EM) is the economic lifespan of a technology, which is dependent and aligned with EIB methodology. Cumulative savings are displayed for LM and EM, quarterly savings are based on LM. Cumulative PES are presented only for EE and CUT technologies. All tenors commence from financial close. Project data is based on estimations for projects under construction and with less than one year of operation and actual data for projects which have been operating for over one year. Savings are apportioned to eeef investment and non-eeef investment. The aggregation of these two values equates to entire project savings. Once maturity is reached, total aggregated savings for that project are still included within cumulative savings reported for the portfolio.

Impact Assessment

Historic development of CO2 emissions reduction and energy savings

	2018	2019	2020	2021	2022
Cumulative CO2 e savings (tCOe)	389,852	530,454	557,363	605,312	619,514
Cumulative Primary Energy Savings (MWh) (all projects)	367,401	921,369	850,584	847,549	988,700
Cumulative Primary Energy Savings (MWh) (EE & CUT)	810,773	1,445,656	1,458,960	1,522,654	1,750,492

Cumulative data include calculations from financial close to loan maturity, based on estimations for projects under construction and with less than one year of operations and actual data for projects which have been in operation for over one year. Savings are for total project investment volume (ie. eeef and non-eeef investments).

From 2018 to 2019, several other projects have adapted their savings estimations due to projects specifics, such as CIMAC, which also contributed to a clear upward trend from 2018 to 2019, as compared to the intervals In the current report, we updated the 2022 carbon savings and energy savings data with IEA Emissions Factors 2022. Universidad Politécnica de Madrid savings are based on preliminary data, which has not been finalised before this report was issued.

Social and Environmental Management System (SEMS)

eeef's Social and Environmental Management System ("SEMS") defines the respective roles and responsibilities of the Fund and its Partner Institutions ("PI") in promoting social and environmental ("S&E") sustainability. For eeef's S&E policy including SEMS questionnaire, please refer to: <https://www.eeef.lu/social-environmental-standards.html> . The SEMS questionnaire covers specific ESG aspects re. the PIs and the funded project implementation process.

Project Name	Partner Institution	Country	Sector	SEMS questionnaire findings in

(1) Signet Bank (SB) - the bank does not have SEMS or ESG policy. SB has developed a sustainability governance structure within the organisation, identifying key roles and areas of responsibility to ensure that sustainability efforts address significant issues and that they are implemented across the entire organisation.

(2) Update on the ongoing investigation on Siram Veolia from the Court of Palermo for alleged corruption. The individuals have been immediately suspended from all their duties. One employee is acquitted of all charges, the proceeding is pending for the second person, the preliminary investigations are still ongoing re. the third investigated individual. AIFM ensured no link with the eeef JV, however the event triggered a higher risk rating.

(3) Enertika has no written anti-corruption or anti-bribery policy in place.

eeef contribution to UN SDGs

The European Energy Efficiency Fund work actively to contribute to the internationally recognized United Nations (UN) goals for sustainable development, the so-called Sustainable Development Goals (SDGs). The fund registered its partnership for UN SDGs and mapped its impact against the following SDGs 7, 11, 13 in the beginning of 2020. The sustainable progress of each goal is now measured with eeef defined indicators which are closely aligned to SDGs framework.

Number of eeef renewable energy & energy efficiency projects\* contributing to doubling the global rate of improvement in energy efficiency:

<b>15 projects</b>	<b>2 projects</b>	<b>1 project</b>
in Energy Efficiency	in Renewable Energy	in Clean Urban Transport

\*Only active projects. OVHA, Signet Bank, Coop Pank and VIPA are included under EE with a portfolio-mix of EE and RE investments.

Annual number of people reached<sup>(1)</sup> through all eeef investments:

<b>~ 2 million people*</b>	<b>~ 1.8 million people</b>
through eeef investments	through eeef TA projects

\*Incl. matured investments

Number of countries and public authorities, in in which eeef is engaged via its projects since inception (all eligible due to public link)

**10 Countries (9 Member States and the UK)**  
**56 public authorities**

(1) Number of population reached is calculated based on the estimation considered for each individual project. For eeef investment projects, estimation of people reached is based on the percentage amount of the population of the city or region achieved through eeef investments (e.g. calculation number of staff, students, professors, patients, etc.) For the TA projects, beneficiary population is calculated based on the city population where the TA projects takes place.

## Population reached through eeef active investment activities

eeef investment projects	City / region	Annual population reached	Notes on population reached
<b>ACTIVE</b>			
1 Jewish Museum Berlin	Berlin	700,000	Average number of visitors per year who visit the Jewish Museum Berlin since its opening in 2001.
2 City of Orléans	Orleans	57,120	Part of population benefiting from either heat or power of the CHP project in the City of Orleans.
3 University Hospital S. Orsola-Malpighi	Bologna	20,000	The total number of academic staff (professors, lectures), students, patients and non-academic staff.
4 City of Rennes	Rennes	85,680	Part of population benefiting from either heat or power of the CHP project in the City of Rennes.
5 City of Venlo	Venlo	100,536	The total population of city of Venlo (census 2015) is considered as reached population.
6 Universidad Politécnica de Madrid	Madrid	46,000	The total number of students, academic and non-academic staff working at campus of UPM.
7 Ore Valley Housing Association	Cardenden	6,533	The total number of residents and tenants who live in the project area (based on the reported figures from OVHA).
8 City of Santander	Santander	572,044	The total population of city of Santander including average number of tourists visiting the city of Santander each year.
9 Illuminated Cities	Rozzano	42,557	The total population living in the municipality included in pipeline at closing date.
10 CIMAC Portugal	CIMAC Region	167,000	The total population living in 14 municipalities (census 2011) that are located in the Alentejo Central Region in Portugal where upgrade of luminaries would be perform.
11 Dancer Mobility	Klaipeda	0	People reached will be estimated based on number of population using public transport. The project seek to replace 10 diesel buses in Klaipeda. There are no busses used from the project yet.
12 Vila do Conde	Vila do Conde	79,533	The total population of Vila do Conde as of census 2011.
13 VIPA	Multiple regions in Lithuania	1,033	The first project approved by the Investment Platform has reached 474 number of households. To reach the number of beneficiary people, this number has been multiplied by the average household size of 2.18 persons.*
14 Gijón	Gijón population	269,311	The total population of city of Gijón (census 2021) is considered as reached population.
15 Signet Bank	N/A	N/A	Impacted population will be included once the capital is disbursed to the sub-loans.
16 Energetica	N/A	N/A	Impacted population will be included once the capital is fully disbursed to the invested project.
17 Coop Pank	N/A	N/A	Impacted population will be included once the capital is disbursed to the sub-loans.
<b>Total</b>		<b>2,147,347</b>	

Not including matured investments which around to 4.8 million people impacted.

\*Source : Oficialiosios statistikos portalas

Population reached through eeef Technical Assistance (TA) Facility activities

eeef TA projects		City / region	Annual population reached	Notes on population reached
1	City of Gijón	Gijón	Included in eeef investments	Population reached through eeef Technical Assistance (TA) projects is calculated based on the population of a city/region where the TA projects take place.
2	Province of Ferrara	Ferrara	345,691	
3	Ducal Palace of Modena	Modena	186,741	
4	Kaunas District Municipal Administration	Kaunas	96,441	
5	Autonomous Province of Bolzano	Bolzano	533,373	
6	Ukmerge District Municipality Administration	Ukmerge	33,471	
7	Administration of Silute District Municipality	Silute	14,968	
8	Klaipėda University Hospital	Klaipėda	162,690	
9	City of Sestao	Sestao	29,224	
10	Daugavpils City Municipality	Daugavpils	80,627	
11	Barcelona Metropolitan Area	15 municipalities	369,199	
12	The University of Oviedo	Oviedo	25,000	
Total			1,877,425	

The population reached, for both eeef investment activities and eeef Technical Assistance Facility projects, is annualised number and is estimated with a prudent approach.

Number of reached population through eeef investment activities is calculated based on the estimation considered for each individual project as reported in the investment committee proposal.

For eeef investment projects, estimation of people reached is based on amount of the population of the city and/or the region achieved through eeef project activities (e.g., calculation number of staff, students, professors, patients, etc.)

For the TA projects, beneficiary population is calculated based on the city population where the TA projects takes place.

### Active investments

#### Project: Jewish Museum Berlin

Country:	Germany
Sector:	Energy Efficiency
Type of Investment:	Forfeiting
Total project size (€ m):	1.4
eeef investment size (€ m):	0.9
Financial close:	20 March 2012
Maturity:	13 years
Status:	In operation

#### General description

Johnson Controls' Energy Service Company (ESCO) and the Jewish Museum Berlin entered into an amended Energy Performance Contract (EPC) for both buildings of the museum with a total EPC volume of € 1.4 m. Agreeing on energy efficiency measures comprising of the optimisation of heating, ventilation & air conditioning and an efficient energy management system, the project is expected to achieve a 26 % reduction of CO2 emissions compared to the baseline. It is a lighthouse project because of its innovative financing structure using forfeiting as a funding source.

#### Recent developments

- Project performance in line with envisaged plan.

#### Project: University Hospital S. Orsola Malpighi

Country:	Italy
Sector:	Energy Efficiency
Type of Investment:	Senior debt
Total project size (€ m):	41.0
eeef investment size (€ m):	30.2
Financial close:	8 May 2013
Maturity:	20 years
Status:	In operation

#### General description

The project entity, Progetto ISOM S. p. A., a special purpose vehicle (SPV) which is the counterparty of eeef, signed a concession agreement with the University Hospital S. Orsola Malpighi (UHSOM) in Bologna. Planned initiatives are intended to raise the energy efficiency of the entire fluid production and distribution system and reduce energy consumption via adoption of energy efficient equipment such as centrifugal chillers and absorbers, reconstruction of heat distribution networks, renovation of heat exchange substations and inclusion of a tri-generation plant for the combined production of cooling, heat and power (CCHP) sized on the basis of the energy consumption of the hospital facility which is fuelled by methane gas. The project will achieve a reduction of CO2 emissions by 7,881 tonnes p. a., approx. 26 % compared to the baseline. It has been the largest energy efficiency upgrade in Italy under a public-private partnership (PPP) framework at the time of financial close and is a lighthouse project which demonstrates the positive impact of energy efficiency measures in public healthcare.

#### Recent developments

- Project performance in line with envisaged plan.

#### Project: City of Orléans

Country:	France
Sector:	Renewable Energy
Type of Investment:	Equity & shareholder loan
Total project size (€ m):	36.0
eeef investment size (€ m):	5.1
Financial close:	12 December 2013
Maturity:	20 years
Status:	In operation

#### General description

Dalkia France and eeef invested in the Orleans Biomasse Energie project which operates a combined heat and power facility with an electrical output of 9.8 MW and thermal output of 22 MW over 20 years. This renewable energy project consumes the wood chips to generate heat and electricity and as such contributes to negative primary energy savings compared to fossil fuel (natural gas) that has considerably higher calorific value. The plant supplies 21,000 households in the city with green heat. The facility saves ca. 17,266 tonnes of CO2 per year.

#### Recent developments

- Project performance in line with envisaged plan.

<b>Project: City of Venlo</b> 	Country: The Netherlands Sector: Energy Efficiency Type of Investment: Senior debt Total project size (€ m): 8.6 eeef investment size (€ m): 8.5 Financial close: 3 April 2014 Maturity: 15 years Status: In operation
<b>General description</b>	
<p>The City of Venlo signed a long-term financing contract for € 8.5 m to finance street lighting upgrades with the objective of equipping a minimum of 16,000 lighting points with LED lights (73 % of the total lighting points of the city) and achieving more than 56 % energy savings. The existing public lighting is the largest consumer of electricity with approximately 36 % of total consumption of the municipality. The large-scale street lighting upgrade is a further sign of the city's commitment towards environmental sustainability including, among other things, being one of the first cities in the world to support the principle of 'Cradle to Cradle' (C2C), a framework for using sustainable energy resources only, phasing out conventional energy sources.</p>

<b>Project: City of Santander</b>		
	Country:	Spain
	Sector:	Energy Efficiency
	Type of Investment:	Forfeiting loan
	Total project size (€ m):	9.2
	eeef investment size (€ m):	9.2
	Financial close:	18 August 2017
	Maturity:	14 years
	Status:	In operation
General description		
<p>The project consists of the upgrade of the existing street lighting luminaires from predominantly high pressure sodium vapour lamps to the last generation PHILIPS LEDs. Within the 12 months construction period, the number of lighting points replaced are 22,300 units. A system of UVEX wireless sensors connects the whole infrastructure point-by-point with the City's digital communication network and the remote CEMILUX control system. Savings in CO2 and primary energy are 79 % compared to the baseline. The project emerged from the European Commission Technical Assistance, successfully completed in 2015, with the Municipality of Santander receiving €450k of funding to conduct energy audits, set up the street lighting investment programme and the tender documents.</p>

<b>General description</b>																	
<p>eeef and Acciona ESCO S.L. signed a forfeiting facility of up to € 19.5 million with term of 11 years to finance the renovation of lighting points on public streets and buildings in the Municipality of Gijón Spain in alignment with a prepared Investment Programme within the Technical Assistance facility. Gijón is eeef's 3rd project with the off-balance sheet structure in Spain. Post implementation of the Investment Programme, Gijón would immediately benefit from lower energy expenses and CO2 footprint. As per conservative estimates, the project is expected to deliver at least 48.02% in primary energy and CO2 savings annually compared to the current baseline, representing 37,005 MWh and 3,160 tCO2e, respectively. When compared to other similar projects financed by the eeef in Spain and in Portugal, the real annual savings in primary energy and CO2 emissions is likely to exceed 60%.</p>

	Sector:	Energy Efficiency
	Type of Investment:	Corporate loan
	Total project size (€ m):	19.2
	eeef investment size (€ m):	15.7
	Financial close:	18 December 2023
	Maturity:	7 years
Status:		Implementation phase
General description		
eeef will provide a corporate loan of €15.7m to Energetica S.p.A. (Energetica) with maturity in December 2030. The loan will be used by Energetica to finance energy efficiency works in building retrofitting and upgrading activities for cogeneration district heating projects. The district heating projects are located in the Municipalities of Bardonecchia and Valtournenche, whereas the retrofitted buildings are in Piedmont, Liguria and Aosta Valley. Energetica plans to implement three projects by mid 2025, during which it will fully utilize the loan amount. The projects will deliver on an average 45.59% savings in primary energy and on an average 44.62% savings in CO2 emission annually compared to the current baseline.		
Recent developments		
• The Fund made the total disbursement of €6.2m to Energetica.

General description			
Johnson Controls' ESCO and the University of Applied Sciences Munich (UoM) entered into an energy performance contract (EPC) for both buildings of the UoM's campus in Munich-Pasing with a total EPC volume of € 1.1 m. The ESCO and UoM agreed on energy efficiency measures comprising the acquisition of a 49.5 kW combined heat and power (CHP) plant, the optimisation of heating, lighting, metering, building management and pumping. The implementation of all measures achieves a 6 % reduction of CO2 emissions compared to the baseline. The ESCO guarantees the UoM certain energy savings p. a. and performs maintenance and building operation services for the 10 year contract period. This project is a role model for further energy efficiency investments in educational facilities such as schools, universities etc.

		Status:	Repaid
General description			
The Société Publique Locale d'Efficacité Énergétique (SPL) signed a mid-term loan agreement for € 5 m to finance the refurbishment of public buildings during their construction phase and to pave the way for raising further long term financing. The SPL was initiated by the Région Rhône-Alpes as a private special purpose company under the French Commercial Code, but operating with public capital. It is associated with a number of public authorities in the region and is dedicated to implementing energy-efficient refurbishment projects of public buildings (high schools, schools and gymnasiums), including renewable energy production. By setting an example of upgrading public buildings, while going beyond standard thermal regulations, the SPL is thinking ahead and aims to achieve its long-term objectives of energy savings and greenhouse gas reduction.			
Recent developments			
• Investment fully repaid in February 2018.			

eeef Technical Assistance development

By the end of 2016, eeef set up its Technical Assistance (TA) Facility. The objective is to support public authorities with energy audits, public procurement, and the calculation of benefits to prepare investment programs for a sustainable transformation in energy efficiency and small-scale renewable energy. eeef has selected a pool of consultants to work close to the public authorities during all the preparatory phases, from feasibility studies to energy audits to assistance in the public tender processes.

From the TA Facility's inception to date, twelve public beneficiaries have been selected across Spain, Italy, Lithuania, and Latvia:

- a) City of Gijón (Spain),
- b) Ferrara Province - via SIPRO (Italy),
- c) Italian Ministry of Defense – Modena Ducal Palace (Italy),
- d) Kaunas District Municipal Administration (Lithuania),
- e) Autonomous Province of Bolzano (Italy),
- f) Ukmerge District Municipality (Lithuania),
- g) Administration of Silute District Municipality (Lithuania),
- h) Klaipėda University Hospital (Lithuania),
- i) City of Sestao (Spain),
- j) Daugavpils City Municipality (Latvia)
- k) Barcelona Metropolitan Area (Spain), and
- l) University of Oviedo (Spain).

Additionally, seven of these projects (i.e., Ferrara Province, Modena, Bolzano, Kaunas, Gijón, Ukmerge, and Silute) have already published the tender.

On 04 October 2023, the Fund and the European Investment Bank ('EIB') - European Local Energy Assistance ('ELENA') TA Facility signed a contract (ELENA Contract 2020-177) under the Horizon 2020 Programme of the European Union for funding new project development services ('PDS'). ELENA is expected to allocate up to €1.9m to the eeef TA programme within a timeframe of three years. By October 2023, a first pre-financing of €770,400.00 was disbursed, building the eeef's TA Facility available for new projects to over €770,400.00.

To kick off the new phase of the eeef TA Facility, eeef launched a call for proposals for public authorities on 26 January 2024. This was published on the Fund's website (<http://eeef.eu/how-to-apply-as-ta-beneficiary.html>) and via TED (Supplement to the Official Journal of the European Union). The deadline was extended to 15 April 2024 as several public authorities from Latvia, Lithuania, Italy, Romania, and Spain have contacted the Fund looking for TA support. Active collaboration with these authorities is expected to begin by Q2/2024. Going forward eeef is open (no deadline) for TA project proposals on a first-come-first-serve basis, subject to the availability of funds and the Fund's appetite for proposed sector/technology, etc.

Technical Assistance Programmes:

Since the TA Facility's inception, twelve public authorities have participated in the TA programme. The respective TA projects will be divided into two categories: (i) active projects and (ii) finalised projects, based on whether they have reached contractual Closing ( i.e., concession contract was signed).

<b>Project: Autonomous Province of Bolzano</b> 	<b>Country:</b> Italy	
	<b>Sector:</b> Energy Efficiency	
	<b>Total project size (€ m):</b>	40.1
	<b>TA amount approved (€ m):</b>	400,000
	<b>eeef TA agreement close:</b>	13 June 2019
<b>General description</b>		
eeef signed the Technical Assistance Agreement to renovate 27 public buildings in the Autonomous Province of Bolzano (PBA), Italy, in June 2019. The buildings owned by the province are expected to consume less energy in the near future, thanks to planned investments of around €40.1m instead of the initial assumption of €42m. Once the studies and audits are completed, the second phase of the project will begin with selecting the relevant companies for the renovation and management works. The first tender was published in 2020.		
<b>Recent developments</b>		
<ul style="list-style-type: none"><li>Regarding the publication of the tender, the PBA decided to do a "call for a project promoter "using a private proposal of the PPP procedure. In March 2022, the definitive promoter was announced.</li><li>A legal period to present claims and requests regarding qualifications applied. This coincided with the entry into force of the new Italian Public Contracts Code (Legislative Decree No. 36/2023), effective as of 1 July 2023. To adopt this new law, some of the studies from the project needed to be updated. Therefore, the project got delayed. Bolzano requested an extension of the TA Contract, which was granted until 30 November 2023.</li><li>On 30 November 2023, the tender was published, and one bid was submitted (by the promoter). Currently, the evaluation process has begun.</li></ul>

Active projects

**Project: Ukmergė District Municipality Administration**

Country: Lithuania  
Sector: Energy Efficiency  
Total project size (€ m): 3.9  
TA amount approved (€ m): 160,000  
eeef TA agreement close: 09 September 2019

**General description**

Ukmergė District Municipality is a municipality situated in Vilnius County, Lithuania. The capital of the municipality is Ukmergė and is the largest settlement in the municipality. eeef signed a TA Agreement with Ukmergė District Municipality Administration to help them prepare and implement an investment program for the renovation of five municipal public buildings: (i) Ukmergė Dukstynos Primary School, (ii) Ukmergė District Taujenai Gymnasium, (iii) Ukmergė District Vidiskes Basic School, (iv) Ukmergė children's nursery "Eglutė" and (v) the Ukmergė Uzupis Primary School. The aim is to improve the buildings' energy efficiency and ensure that they meet the national energy performance requirements to facilitate a positive contribution to the national strategic objectives in energy efficiency. The TA services, provided by experienced local consultants, will support the efforts of the Administration's employees to prepare the investment project.

**Recent developments**

- TA works have been completed, and tender documents finalised.
- In October 2021, the tender was published. In February 2023, two bidders submitted final proposals. The bids were over budget, mainly due to the price increase (i.e., inflation).
- In March 2023, Municipal elections occurred. The final decision regarding the tender process was expected to happen with the new government. Nevertheless, the process was extended.
- New calculations to fit the budget were presented to the municipality. The possibility of relaunching the tender is being evaluated, and further options are discussed with the Fund and TA Consultant.
- Tender is expected to be published by Q2/2024.

**Project: Administration of Šilutė District Municipality**

Country: Lithuania  
Sector: Energy Efficiency  
Total project size (€ m): 9.0  
TA amount approved (€ m): 195,000  
eeef TA agreement close: 10 July 2020

**General description**

The Silute District Municipality is situated in the southern part of Klaipėda County, one of the most developing regions of the country. This is mainly determined by the Klaipėda port, the only northernmost ice-free port in the eastern part of the Baltic Sea. The Silute District Municipality is planning the implementation of an ambitious investment program that will improve the energy efficiency of municipal public buildings and thus ensure that they meet the national strategic objectives and energy efficiency requirements. The aim is to modernise 11 public buildings, which are the following: (i) Rusnes Culture House, (ii) Šilutė nursery "Azuoliukas," (iii) Šilutė Pamario Primary School, (iv) Šilutė nursery "Gintarelis," (v) Kintai Primary School, (vi) Saugai Jurgis Miksas Primary School, (vii) Šilutė District Municipality Sveksnos nursery, (viii) Usenai Primary School, (xi) Silute District Municipality building, (x) Šilutė Hospital and (xi) Vilkyčiai School.

**Recent developments**

- TA works have been completed, and tender documents finalised.
- In June 2022, the tender documents were published. Three bidders were invited to submit their proposals (pre-qualification stage).
- In March 2023, the contract was reviewed by the Ministry of Finance to verify whether it was aligned with the requirements. Comments were raised and sent to the municipality for final adjustment, resulting in the adjustment of the final proposals by the bidders.
- On 27 June 2023, the deadline for contractors to submit their final offers occurred, and no offers were received.
- Currently, Silute is evaluating the possibility of relaunching the tender and is discussing further options for getting a subsidy.
- The tender is expected to be relaunched by Q2/2024.

Sector:

Total project size (€ m):

TA amount approved (€ m):

eeef TA agreement close:

Spain

Energy Efficiency

23.0

400,000

24 April 2017

General description

The city of Gijón is planning the implementation of an ambitious sustainable investment programme, comprising energy audits of 157 public buildings and 42,808 street lighting points and identifying the appropriate set of energy efficiency and/or renewable energy-related interventions. The project promotes the comprehensive and intelligent management of the electricity and thermal supply of street lighting, municipal buildings and facilities, the development and operation of the neutral, open and interoperable network for IoT and the innovation of services for its green and digital development.

The total expected project volume is €23.01m, which is comprised of €19.4m street lighting investment (includes IoT nodes and getaways) and €3.5m building investment. The following preparation and publication of the call for tender will result in selecting preferably an ESCO company to realise the measures within a two-year timeframe. As a Covenant of Mayor and RECI member – the Spanish Association for Smart Cities – Gijón is fully committed to sharing its experience and best practices with other public authorities, thereby boosting the replication potential for such types of projects in Spain and Europe-wide.

Recent developments

- Gijón TA programme has reached Closing and is finalised.
- On 20 December 2020, the tender was published.A winner ESCO was selected and the concession contract signed by Q4/2021.
- In September 2022, eeef and Acciona ESCO S.L. signed a forfaiting facility of up to €19.5m with a term of 11 years to finance the renovation of lighting points on public streets and buildings in the Municipality of Gijón, Spain, in alignment with a prepared Investment Programme within the eeef Technical Assistance facility.

eeef TA agreement close:

Italy

Energy Efficiency

30.8

389,500

31 May 2017

General description

Located in Emilia Romagna Region, the Province of Ferrara joined forces with SIPRO (Agenzia Provinciale per lo Sviluppo), a development agency with a 40-years track record, to prevent high energy consumption and losses going forward. The investment program addresses the implementation of energy efficiency measures in several municipalities, with deep energy retrofiting of 12 buildings such as schools, offices, town halls and sport facilities in Ferrara, Mesola and Cento and the replacement of 27,616 public lighting points with LED technology in Ferrara and Voghiera.

Recent developments

- Ferrara Province TA programme has reached Closing and is finalised.
- TA works have been completed for public street lighting and building renovation in all involved municipalities: Ferrara, Mesola, Cento, and Voguiera, even though Cento and Voguiera did not launch any tender:
  - Regarding public buildings, a) the Municipality of Ferrara published the tender on 29 April 2020, and the contract was awarded to an ESCO in September 2020; b) the Municipality of Mesola published the tender in April 2018 and awarded the service to an ESCO; c) the Municipality of Cento decided not to publish the tender since its political framework had changed and the new government had other priorities.
  - Regarding street lighting, a) the Municipality of Ferrara published the tender in March 2018, and the contract was awarded to an ESCO in July 2019; b) the Municipality of Voguiera did not launch a tender as it needed to involve a contracting authority and cover relevant costs for the tender process necessary for refurbishing the obsolete public lighting systems.

<b>Project: Italian Ministry of Defence – Ducal Palace</b>		Country:	Italy
		Sector:	Energy Efficiency
		Total project size (€ m):	9.0
		TA amount approved (€ m):	340,000
		eeef TA agreement close:	14 February 2018
<b>General description</b>			
<p>The Ducal Palace in Modena is owned by the Italian government and is currently used by the Italian Ministry of Defence (MoD). The total project volume is ca. €9m, which has increased compared to the initial assumption of €8.1m. This is comprised of €5.2m thermal systems and €3.8m building envelope. The upgrade of thermal systems is expected to include new pipes for the network distribution plus improvement of the existing ones, an advanced climate control system, replacement of old radiators and boilers, and retrofitting of the hot water system. For the building envelope, the MoD plans to reduce thermal losses by introducing insulation in internal opaque walls and air infiltration with improved sealing of window frames. The Ducal Palace of Modena is located in the City of Modena, in the Italian region of Emilia Romagna. The palace was the residence of the Este Dukes of Modena. The main part of the building is currently used by the MoD and houses the headquarters of the Military Academy. In this building, military students attend academic lessons of several university courses, held by professors from the public University of Modena and Reggio Emilia (UNIMORE). Part of the Eastern Tower of the palace houses the geophysical-meteorological observatory of UNIMORE, while the first floor is a public museum of the Military Academy with guided tours offered by the Municipality of Modena.</p>

<b>Project: Kaunas District Municipality Administration</b>		Country:	Lithuania
		Sector:	Energy Efficiency
		Total project size (€ m):	3,7
		TA amount approved (€ m):	180,000
		eeef TA agreement close:	27 December 2018
<b>General description</b>			
<p>The Kaunas District Municipality surrounds the Kaunas City Municipality, the second-largest city in Lithuania. It is one of the country's biggest and most densely inhabited municipalities of the country, including 3 cities, 9 towns and 371 villages. eeef is supporting the Kaunas District Municipality Administration of the Republic of Lithuania to prepare and implement an ambitious investment programme for a street lighting upgrade, covering audits, technical and financial studies and assistance in the tender process. The project initially estimated LED installation on approx. 10.000 lighting points. The full implementation of the investment programme will achieve at least 1.76 GWh per year in primary energy savings.</p>			
<b>Recent developments</b>			
<ul style="list-style-type: none"><li>Kaunas TA programme has reached Closing and is finalised.</li><li>Initially, the tender was published in August 2020. However, the municipality relaunched the tender on 5 October 2020 due to the interest in including specifications regarding the bidder requirements.</li><li>In December 2021, a definitive winner ESCO was announced.</li><li>In June 2022, Kaunas signed a public-private partnership agreement for the implementation of the project and reached contractual Closing.</li><li>Final reports of the TA Consultant and TA Beneficiary are expected to be submitted by Q1/2024.</li><li>Currently, the project is in the implementation stage. The total investment amounts to €3.7m, of which eeef' JV with VIPA (TIPS: Promoting Sustainable Resource Development) provided a loan of €2.9 m.</li></ul>
